CUSTOMER PROFILE

AIR FRANCE KLM

KLM Royal Dutch Airlines provides service to 600 destinations all over the world. It's been part of the Air France-KLM Group since a merger in 2004.

Destinations 600
Countries Global
Employees 84,000

THE SITUATION

To get ready to move to Microsoft Office 365, the company needed to unify their 24,000 users into the same Active Directory.

BENEFITS

- Automated migration with zero downtime
- A common directory across companies
- Single sign-on for employees, partners, and customers
- Ready for future collaboration tools
- No longer paying more than one license per user

“We’re very positive about our experience with Binary Tree. Their software does exactly what they say it does. And their project team has been very helpful throughout. It’s been a real pleasure working with them.”

*Project Manager
Air France-KLM*

THE CHALLENGE

After the merger, Air France and KLM each had their own instance of Active Directory, which were used to manage permissions and accounts for their IT tools, users, and applications.

Over time, these separate AD environments became cumbersome for users and admins alike. There were two of everything: two security contexts, two tool systems, and two ways to administrate. They were even paying two licenses per user. This complexity was becoming difficult to navigate, and it wasn’t easy to add new users, applications, or partners.

Then came the decision that set them on a new course. It was decided to move off separate messaging environments of IBM Notes and Microsoft Exchange— and on to the Microsoft Office 365 cloud. Which means one also needed to unify Active Directory so it could become the single source of truth to manage permissions in Office 365. It was time to consolidate.

THE SOLUTION

Their IT team put the word out for the right vendor to help unify their directories. After evaluating key players in this space, they landed on Binary Tree by Quest. Binary Tree Migrator Pro by Quest for Active Directory was chosen to automate their migration to a unified directory. And they enlisted Binary Tree services to help them with the proof of concept.

“Binary Tree helped us set everything up in our test environment,” said the project manager for AIR FRANCE-KLM. “They walked us through how to use the tool so we’d be able to do everything ourselves later in production. And we’re also consulting with them during the migration as things come up.”

THE RESULTS

Now, AIR FRANCE-KLM is well on their way to migrating their 24,000 users to a single, unified directory—all with zero downtime.

“This was one of the key goals of the project, and a big reason why we chose Binary Tree,” says the Project Manager for AFKL. “We didn’t want there to be any disruption to our end users.”

A unified Active Directory will give them a single sign-on across their employees, partners, and customers. They’ll also be able to add new partners and applications more easily. And they no longer have to pay more than one license per user.

ABOUT QUEST

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
